EXPERIENCE

Software Developer

Appflix Studio By CarInfo

June 2023 - ongoing Dwarka, India

carinfo.app

Working as a React/Next JS developer

- Design carinfo.app from ground zero.
- Skyrocketed Monthly Traffic from 2k to an impressive 60k in just 4 months.
- Achieved first place in a hackathon for developing 'Service History,' a platform enabling users to access any used car's service records for just 299, driving revenue and increasing Daily Active Users (DAU)
- Achieved first place in a hackathon, Launched "Lok Adalat" in just 2 days, offering users a one-click resolution for their challans by paying only 399.
- Seamlessly integrated features including RC search, challan checks, insurance services, service history access, and new/used car purchasing, among others. Integrate Google ads on web to boost revenue
- Setup GA event tracking to make funnel and track user behaviour and hence providing more stable and better UX.
- Setup business for our partner like car dekho , spinny, RTO care, RTO lane, Highway delight etc.
- Developed New car which is giving leads to car manufacturers and help them for selling more cars. helps in boosting revenue from web
- Implemented Razor pay gateway , google ads on web to boost revenue

Associate Software Engineer

TSYS - A Global Payments company

July 2022 - June 2023 Noida, India

Global Payments Internal Portal - TeamGP

Worked as a React developer responsible for handling components and Mainly worked on these :-

- Code optimization on GP portal decreased initial load time
- Initial Architecture setup for IGP portal
- Work on providing more stable system by handling error case
- Setup up middleware for better security
- Migrating MUI from legacy code to pure html css using scss
- Move repeated codes to helper method causing performance optimization and removed over 1200+ lined of code

Application Development Associate

Accenture

October 2021 - July 2022 Gurugram, India

PERSONAL PROJECTS

FOOD WEB APP USING REACT JS

I have created a food web app with below specified functionality :-

- Use Swiggy API, for fetching data
- setup all routes for various components
- Add to cart functionality using Context API
- Hooks - useState, useEffect, useParams, useRouterError
- Fetch data, Making API calls , useEffect
- Conditional Rendering of state + components
- Basic Tailwind CSS

Green Consultancy Website

Completed this project in college as a part of my FreeLancing work. the website is live at egt.org.in

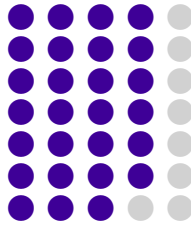

CERTIFICATES

- Best contributor for Development - CarInfo
- MANGTAS Certified Front End React Engineer
- Accenture Training completion certificate - React Js
- COURSERA JavaScript
- HackerRank Problem Solving certificate (Basic)

- Worked on Internal projects help them converting figma to UI design.

LANGUAGES & FRAMEWORK

React Js
Next JS
HTML
CSS
MUI
JavaScript
TypeScript

ACHIEVEMENTS

- 1st position in Diploma
- 1st prize in hackathon Organized by CarInfo
- Merit Holder in Accenture Stream Training (REACT)
- 2nd position in React Fastest Fingers first Organized by TSYS
