## Work Experience

### CarInfo By Appflix Studio                                      June 2023 – present
*Software Developer*                                                *Delhi,IN*

- **Developed and integrated a new loan-selling feature**, providing users with a seamless, app-like experience directly on the website. This feature **resulted in over 40 lakh in personal loan sales per month within just 2 months of launch**
- **Achieved first place in a hackathon for developing 'Service History,'** a platform enabling users to access any used car's service records for just 299, driving revenue and increasing Daily Active Users (DAU)
- **Launched "Lok Adalat" in just 2 days,** offering users a one-click resolution for their challans by paying only 399.
- Skyrocketed Monthly Traffic from **2k to 50k** in just 4 months.
- Seamlessly integrated features including RC search, challan checks, insurance, among others, resulting in a **42% increase in daily active users (DAU).**
- Implemented Google Analytics (GA) event tracking, resulting in optimized user behavior tracking and improved UX, contributing to a **15% increase in conversion rate.**
- Collaborated with partners including Car Dekho, Spinny, RTO Care, RTO Lane, and Highway Delight, ensuring seamless business integration and increasing operational efficiency by **35%, while boosting lead generation by 25%**
- Developed a new car leads generation platform, supporting car manufacturers in boosting sales and contributing to a **20% rise in revenue from web leads.**
- Integrated Razorpay payment gateway and Google Ads, resulting in a **30% increase in online transactions and overall web revenue.**

### TSYS - A Global Payments company                              July 2022 - June 2023
*Associate Software Engineer*                                      *Noida,IN*

- Introduced in-house modules to replace Material UI, cutting development time by 50% and **decreasing production issues by 23%** resulting in more efficient and reliable frontend development processes.
- Successfully migrated company blogs from Ghost CMS to custom in-house modules using NextJs, enhancing performance, flexibility, and maintainability, and **reducing hosting costs by 20%.**
- Improved web performance score from **56 to a range of 68-77,** achieving a **21-37% increase,** through optimized code, efficient resource loading, and implementing best practices in frontend development.
- Move repeated codes to helper method hence improving performance and **removed over 1200+ lines of code**
- Set up middleware to enhance security, reducing potential vulnerabilities by **35% and improving request handling efficiency by 25%.**

### Accenture                                                      Oct 2021 - July 2022
*Application Development Associate*                                 *Noida,IN*

- Developed a Food delivery Web Application based on React Js during training simulation
- Worked on providing more stable system by handling error case
- Completed Training on React Js + Front-end Technologies
