EXPERIENCE

Software Engineer
Appflix Studio - CarInfo

📅 June 2023 - ongoing 📍 Dwarka, India

👤 **carinfo.app**
Working as a React/Next JS developer
- Have developed carinfo.app from ground zero
- Setup GA event tracking to make funnel and track user behaviour and hence providing more stable and better UX.
- Setup business for our partner like car dekho , spinny, RTO care, RTO lane, Highway delight etc.
- Won 1st prize in hackathon for developing service history in just 2 days. It can give user any car service history by paying 299
- Developed lokadalat product where user can settle there challan in lesser price by just paying 399. that too I have developed in just 2 days
- Developed New car which is giving leads to car manufacturers and help them for selling more cars
- SEO development, have taken web traffic from 2k to 50k
- Worked as a solo developer and developed revenue based products
- Implemented Razor pay gateway , google ads on web to boost revenue

Associate Software Engineer
TSYS - A Global Payments company

📅 July 2022 - June 2023 📍 Noida, India

👤 **Global Payments Internal Portal - TeamGP**
Worked as a React developer responsible for handling components and Mainly worked on these :-
- Code optimization on GP portal
- Architecture setup for IGP portal
- work to provide more stable system by handling error case
- Help in improving portal Performance Replace the react-shimmer-effects library with own custom CSS Shimmer
- setup up middleware for better security
- Migrating MUI from legacy code to pure html css using scss
- worked on converting context API to Redux so to have one big centralized store rather then so many contexts

Application Development Associate
Accenture

📅 October 2021 - July 2022 📍 Gurugram, India
